Focus

Small Animal GP
Exotics

About the Hospital

This is a 2-doctor practice located in Kenwood, OH. This hospital focuses on small animal and exotics medicine. Services include small animal preventative medicine, anesthesia and pain control, dentistry, in-house diagnostics, laser therapy, and exotic pet care such as avian medicine, dentistry, and preventative care.

About the Externship

Extern tasks and responsibilities may include:

The extern will work alongside the doctors and the staff to provide outstanding patient care to AAHA standards. The extern will be able to practice clinical skills like performing physical exams, placing catheters and intubating, client 1 skills like taking histories and discussing treatment plans, interpreting the results of diagnostic tests and creating plans, and participating in surgery and dentistry. In general our goal is for the extern to have a chance to practice 'realworld' veterinary medicine so they can start their first position after graduation with confidence.

Desired skillsets:

Our extern should have a basic medical understanding and be able to formulate a rule out list for common conditions. Our ideal extern is willing to accept coaching from anyone (not just the dvms), have fun while learning, and is eager to be contribute to the team wherever they're needed. Bonus points for a good laugh!
